Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person or system outside the project that sends or receives data (e.g., User, Researcher, Government Policymaker).
Rectangle with numbered header	Process	An activity that transforms incoming data into meaningful output (e.g., Enter HDI Data, Predict HDI Score, Generate Report).
Rectangle (solid fill, no number)	Data Store	A place where data is stored for future use (e.g., HDI Dataset, Prediction Database, User Database).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores (e.g., Country Data, HDI Score, Prediction Result).

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
